The Lost Kingdom of Wine

Description

CHAPTER I

Deep in the heart of the Amazon rainforest, a group of adventurous trekkers embarked on a journey of exploration. Little did they know, their path would lead them to an extraordinary discoveryâ??***the lost Kingdom of Wine***.

They walked almost continuously for three days taking short intermittent halts. On the fourth day as evening approached, the jungle foliage got thinner. A few miles further as they emerged out of it, their eyes fell on a mesmerising sight. Right in front them was a fascinating panorama of endless fields of vines adorned with luscious grapes glistening in the golden light of the setting sun. Towards the far end was a majestic palace on a hill.

The Lost Kingdom of Wine

Dear Reader, today I have taken my first steps towards writing a wine themed fictional story. This story titled The Lost Kingdom of Wine starts with the opening paragraphs as typed above. I would keep publishing each chapter in this space as and when I finish writing it. Do share your views and comments and even suggestions as to what should happen next in the story line. Thanks and cheers.
